

ONLINE RESSOURCES

As natural and conventional medicine continue to integrate, the question of interactions and concomitant effects continues to arise. We receive many queries from customers unsure about where to go while researching for their clients, so we thought we would help out a little. Rest assured, there are plenty of resources at your fingertips that you can effectively put to use as you decide on the best products suited to your customer, client or patient, 24/7.

The most popular database is IM Gateway. Membership is free and you are able to search products for information about any interactions with medications, a product directory, an extensive research database and even some e-learning modules. Hop online and check it out!

Another popular resource site is nPod – Naturopathic Product Online Database. Many of you will already be familiar with this one. This great resource is currently on special in October for \$39 per year, this Australian website is aimed at Health Professionals and the products available to them across most ranges. You can search via brand, ingredient or product and compare and contrast different products – an amazing resource all at the click of a button!

View this great resource designed for practitioners by practitioners

It's easy, up to date, saves time and paper

See how it works - just click the 'Take a Look' button on the Home page
